TO CLINTON HILL COMMUNITY

FROM CLINTON HILL AREA REHABILITATION COMMITTEE

DATE JULY 15, 1960

SUBJECT FORTHCOMING SOCIO-ECONOMIC AND STRUCTURAL SURVEYS

Prior to completion of the reports required for final approval of the Clinton Hill Rehabilitation Project by the Federal Government socio-economic and structural surveys must be made of all property owners and properties in the project area. The advantages of this survey are: (1) The survey findings will eventually provide you with complete information on your property and show you what will have to be done to rehabilitate your house, and (2) The survey information will be used to determine the best means of helping property owners finance the needed home improvements.

There are 4 steps involved in the surveys.

1. Authorized representatives will call on each property owner to obtain socio-economic information necessary for Federal approval of the project
2. A second team of representatives will make a detailed physical study of each structure. The information will be used to give you the best possible plan for rehabilitating your house
3. The general results and findings of these surveys will be released at the conclusion of all survey work. This will probably be around the end of this year, and will include the overall findings only.
4. Individual property owners will be notified of the findings on their own house or houses.
